TimeLabs is an intuitive web based Time Attendance and Salary Management System. It is an elegant solution that keeps the record of an employee's work time; the collection of individual payroll transactions for a person that determines the payments and deductions to be made making it easier for an employer to track his employee's daily working hours and simultaneously his performance.

TimeLabs make it easy to enforce your HR rules, comply with regulations, and generate analytical reports in real-time. You can set company settings including basic timerules, Salaryrules, Leaves, PF / ESI & Overtime rules. Multiple Time-sheet views allows the manager to analyze the daily / weekly / monthly activity of each activity.

Our customers gain instant visibility, make better decisions, Generate Salary Slip faster and reduce their time and expense reporting costs by up to 70 %. With TimeLabs, every report can be sent to Microsoft Word, Microsoft Excel or a printer-friendly format with a single click. TimeLabs is built from the ground up with the latest technologies in mind to provide our customers with a future ready environment.

**Increase your profits by preventing hour slippage and speeding up the time consuming & erroneous manual salary calculations.**
